Washington, DC 20554

RE: PR Docket No. 92-235

Dear Ms. Searcy:

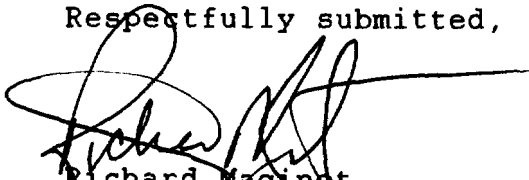

Our Fire Department and Road Department are currently licensed with VHF frequencies in the 154-155 MHz range. It has taken us from 1983 to the present time to purchase adequate equipment for our needs.

If we should lose our ability to use these frequencies due to reallocation, our community would be greatly affected. We have a relatively small budget to work with and it would be a hardship on the community to have to replace our radio systems.

We ask that the commission carefully consider the major impact to all of the small communities across the country and allow us to continue using our current frequencies.

Thank you for your consideration in this matter.

Respectfully submitted,

Richard Maginet
Business Administrator
